ALWAYS CHECK NOTICES TO AIRMEN SECTION

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communications Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
✓ = New facilities or name changes, see page 20

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . . Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS . . . Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. . Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . Range (loop radiators), power less than 50 watts
MM. . . VHF middle marker
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL . . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . VHF outer marker
P. . . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W . . Without voice facilities on range frequency
Z . . . . VHF station location marker at a range station.

RADIOTELEGRAPH CODE

A - ABLE •—	F - FOX ••—•	K - KING —•—	P - PETER •——•	U - UNCLE ••—	Z - ZEBRA ——••
B - BAKER —•••	G GEORGE ——•	L - LOVE •—••	Q - QUEEN ——•—	V - VICTOR •••—	
C - CHARLIE —•—•	H - HOW ••••	M - MIKE ——	R - ROGER •—•	W - WILLIAM •——

E - EASY •	J - JIG •———	O - OBOE ———	T - TARE —	Y - YOKE —•——	

FREQUENCY LEGEND

V = 135.9 and 135.0 mc transmitted.
# = Guards same VHF frequencies station transmits except 122.2 mc and 135.0 mc.
(1) = 3105,4495 kc guarded
(2) = 3105, 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7, 135.9 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-135.9, 122.1 = guards every frequency in group (3) except 135.9 and 122.1

NOTES

1. Range courses are magnetic inbearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VOR or VAR is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

****
Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.
****

(9-25-51)

ALWAYS CHECK NOTICES TO AIRMEN SECTION

RADAR AVAILABLE : How and Where

PAR = PRECISION APPROACH RADAR. ASR = AIRPORT SURVEILLANCE RADAR.
GCA = GROUND CONTROLLED APPROACH - MILITARY EQUIVALENT OF COMBINED ASR AND PAR EQUIPMENT

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for this type of approach are at least as high as, and in some instances higher than, the regular circling minimums listed in the Flight Information Manual for the airport.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Flight Information Manual.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at the pilot's discretion.

After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible.

Civil minimums at military installations estabilshed by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.

Alt MSL=Min. alt. over airport.

(D) = Day. (N) = Night. ➔ =New or revised data. ✓ = New facilities or name changes.

CAA RADAR UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL CAA UNITS GUARD THE VHF FREQUENCIES TRANSMITTED PLUS 3105, 4495 kc AND 122.5 mc. IN ADDITION TO THE FREQUENCIES LISTED, THEY TRANSMIT ON: 118.1, 121.5, 126.18 mc.

STATION	TRANSMITS	RADAR FACILITIES	REMARKS

ALWAYS CHECK NOTICES TO AIRMEN SECTION

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	C	-Commercial	MG	-Misc. Govt
A	-Army (May also be used by Army Nat'l Guard)	CG	-Coast Guard	N	-Navy
		I	-Intermediate	NG	-Air Nat'l Guard
		M	-Municipal	P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

DIRECTORY OF AIRPORTS

LEGEND

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is either not available or not operating standard hours (sunset-sunrise).

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting
L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Portable lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway or Strip
5 - Instrument approach (neon)
6 - High intensity runway
7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:
F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.	C : 73/80 oct.
A : 100/130 oct.	J : JP - 1
B : 91/96 oct.	J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(k) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(l) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Usually unattended, offer no public service and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORT NAME ABBREVIATIONS

AAF - Army Air Field
AFB - Air Force Base
ALF - Auxiliary Landing Field
CGAS - Coast Guard Air Station
MCAS - Marine Corps Air Station
MCAAF - Marine Corps Aux Air Facility
NAAS - Naval Aux Air Station
NAF - Naval Air Facility
NAS - Naval Air Station
OLF - Outlying Field

NEW AIRPORTS (or airports out of alphabetical alignment)

AIRPORTS ON WHICH CAA RECORDS ARE NOT YET AVAILABLE

F-fuel octane. New or revised data. (See Legend Page 21) (9-25-51)

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators. No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commanding Officer, USAF Aeronautical Chart & Information Service, Washington 25, D. C.; Attn: Aeronautical Information Division.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters USAF ACIS.

In connection with the above, the attention of all base operations officers is invited to A. F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A. F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, COAST GUARD AND ARMY:
Listed below are Standard VHF Channels for the Air Force, Navy, Coast Guard and Army.

AIR FORCE*	NAVY ARC-3, -5 SCR-522**		ARMY	SERVICE

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion; Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**In 4 channel equipment (ARC-5 and SCR-522) 132.3 mc or 142.02 mc may be substituted on Channel C and D in accordance with operational requirements.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A. N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

(9-25-51)

✓ Indicates new or revised Special Notices

✓ AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, Calif.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; Westover AFB, Mass.; or Mitchel AFB, N. Y.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C. March AFB, Calif.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by Aeronautical Chart and Information Service and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing station, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listing given in paragraph 5 of this regulation. Base operations officers, weather and communication units should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11); M-59, November 5, 1949 (Service "B").

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fifth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of Dec. 27, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, January 9, 1951; Teletype Maps: M-11 December 1, 1949, and M-14, April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C", and "O").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with Revision 6. (Revisions 1-5 obsolete). Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

Requests for distribution should be directed to Commanding Officer, Aeronautical Chart and Information Service, Washington 25, D. C. Attn: Aeronautical Information Division.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

COMPULSORY REPORTING POINTS- VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UHF CHANNELIZATION: An initial UHF channelization plan has been approved for USAF and USN UHF-equipped aircraft in the U. S. and will be published in subsequent issues of the Radio Facility Charts. UHF frequencies which are being first implemented at USAF stations on a continuing program beginning 1 July 1951 are:

Channel 1	Control tower (military primary)	236.6 mc
" 15	Military Airways	258.20 mc
" 17	GCA	335.80 mc
" 18	GCA	289.40 mc
Guard	Military emergency	243.00 mc

It is contemplated that CAA stations, towers and centers will provide service on UHF. The channels to be used and the date that the services are to be available will be published later.

✓ CHANGES FOR PILOT'S HANDBOOK (EAST) U.S.: (1) AL-29, dtd Dec 11, 1950. Augusta State Airport, Maine. Change Initial Approach to: NE crs 2500' from int NW crs BGR rng. W crs min enroute alt. Change missed approach alt of 1600' to 2500' on NE crs.

(2) AL-261, dtd Oct 11, 1950. Millinocket Airport, Maine. Change Initial Approach from S crs to SW crs 2500' from int NW crs BGR rng. Change missed approach alt of 2300' on S crs to 2500' on SW crs.

(3) AL-401, dtd Dec 21, 1950. Hancock Airport, Syracuse, N.Y. Change Initial Approach to: E crs 3000' from int SW crs UCA rng. Change missed approach procedure to: If visual contact not established at authorized landing minimums within 7.4 mi after passing Syracuse Radio Range, or if landing not accomplished, turn left, climb to 2100' and return to rng stn. Alternate Missed Approach: (when directed by ATC) climb to 3000' on E crs Syracuse LF rdo rng.

(4) AL-433, dtd Apr 13, 1951. Griffiss AFB, Rome, N.Y. Change Initial Approach to: SE crs 3000' int W crs Albany. SW crs 3000' from int E crs SYR Rng.

(5) AL-661, dtd Apr 26, 1951. Wilkes-Barre-Scranton Airport, Pa. Change initial approach on N crs to 4200' from int SE crs ELM Rng. Change missed approach procedure to: If visual contact not established at authorized landing minimums within 4.0 mi after passing Wilkes-Barre rng, or if landing not accomplished, make a climbing left turn, climb to 4000' on SW crs.

✓ CHANGES FOR PILOT'S HANDBOOK (WEST) U.S.: (1) AL-228, dtd July 5, 1950. Las Vegas Airport, N. Mex. Change initial approach SW crs 9600' from int E crs Otto. Change ceiling over aerodrome to 600' and min alt over aerodrome to 7466'.

(2) AL-454, dtd Dec 1, 1950. Wichita Falls, Sheppard AFB, Texas. Change initial approach NW crs 3900' from Clarendon LF Rng. Change missed approach alt of 2500' to 3900' on NW crs within 25 mi. Alternate missed approach (when directed by ATC) turn right and climb to 2500' on NE crs, within 25 mi.

(3) AL-502, dtd May 22, 1951. San Marcos AFB, Texas. Change Procedure Turn from E to W side of N crs. Change Missed Approach Procedure to: If visual contact not established at authorized landing minimums within 4.2 mi after passing San Marcos rdo rng, or if landing not accomplished, make right climbing turn reporting over SRO at 2000'. Hold on N crs 2000' within 15 mi.

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised on hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, Washington 25, D.C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Airman's Guide.

CIVIL USAGE OF MILITARY FIELDS: U.S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data or data impossible to incorporate in the two above tabulations.

DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited: The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The locations at which this direct communications procedure is available are listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing.

VERY HIGH FREQUENCIES FOR PRIVATE PILOTS: Use of very high frequency channels by the majority of private pilots has heretofore been limited to the channels 121.5, 122.1, 122.5 and 122.8 mc. Now, however, any private pilot having need for additional channels may apply to the FCC for use of any of the 40 channels in the 118.1 to 126.7 mc band. To determine their additional requirements, pilots should consult the Airman's Guide (Radio Facilities Section) or contact the nearest CAA regional office for information concerning the channels which have been implemented at the various locations. Of particular interest may be the channel 126.7 mc which was previously limited to use by air carriers for communication with CAA stations (INSACS) but now may be used by any private pilot if required for that purpose.

DVFR FLIGHT PLANS: When an IFR flight plan is canceled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

AERONAUTICAL ADVISORY STATIONS (FREQUENCY 122.8 mc): This requency is known in some areas as the "private flyers frequency" and also as "UNICOM". Licenses for ground stations and aircraft are now being issued by the FCC subsequent to receipt of application for license from private pilots and airport operators eligible to use the frequency. Under the FCC rules, private aircraft may use 122.8 mc for communication with aeronautical advisory stations and between private aircraft themselves while in flight. Particular attention is invited to Section 9.1001 which follows:

"9.1001 Eligibility for station license. Authorizations for aeronatuical advisory stations will be issued only to the owner or operator of a landing area, not served by an airdrome control station. Only one Aeronautical Advisory station will be authorized at a landing area"

The scope of service to be rendered under FCC rules for the ground station is:
"9.1004 Scope of service. (a) Communications shall be limited to the necessities of safe and expeditious operation of aircraft. The service shall be advisory in nature, pertaining to the condition of runways, types of fuel available, wind conditions, available weather information or other information necessary for aircraft operations. (b) Aeronautical Advisory stations shall not be used for the control of aircraft."

The following locations have been reported as having Aeronautical Advisory Service Available:

Bloomsburg Arpt, Pa. (0800-2300)
Concord Arpt, N.H. (daylight hours)
Davenport Arpt, Iowa (0730-2000)
Claremont Arpt, N.H. (daylight hours)
Flat Rock-Nan-Bar Arpt, Mich. (0800-sunset and hrs prior req.)
Keene-Dillant-Hopkins Arpt, N.H. (daylight hours)
Laconia Arpt, N.H. (daylight hours)
Lebanon Arpt, N.H. (daylight hours)
McAllen Arpt, Texas (0800-1900)
Muncie Arpt, Ind. (daylight hours)
Odessa, Tex.-Ector Arpt (0800-dark)
Revere Arpt, Mass. (0900-sunset)
Nashua Arpt, N.H., Borie Fld (daylight hours)
Vineland, N.J.-Kroelinger Arpt, (daylight hrs)

Airport operators interested in providing this service may obtain further details from the nearest FCC or CAA field office.

AIR TRAFFIC CLEARANCES: The initial traffic clearance issued to an aircraft prior to departure will normally authorize flight to the point of first intended landing, with instructions to maintain the altitude at which the aircraft enters the next control area. The pilot should request any desired altitude changes en route. Better service can be given the pilot if any altitude change is requested at the time the change is desired. An amendment to the initial clearance may be issued to a flight at any time the air traffic controller deems such action necessary to avoid possible confliction between en route, landing, or departing aircraft. A flight is always cleared to a specific point or location (radio or visual reporting point), defined as a clearance limit. If the assigned altitude is below the minimum for a subsequent portion of the flight and radio failure is experienced, the procedures outlined under TWO-WAY RADIO FAILURE must be followed to insure proper terrain clearance.

Whenever an aircraft has been cleared to a point other than the destination airport it is the responsibility of Air Traffic Control to issue whatever further clearance is appropriate at least five minutes before the aircraft arrives at the clearance limit, unless holding instructions and a time at which the pilot may expect further clearance have been received and acknowledged by the pilot. In the event a pilot arrives at a clearance limit without having

received either a clearance beyond or holding instructions at such fix, he should immediately request further clearance and hold at the clearance limit, maintaining the last assigned altitude, until further clearance is received. When a clearance limit is a point other than the destination airport, the altitude of the aircraft at this clearance limit will be protected so that separation will exist in the event the aircraft must hold awaiting further clearance. NOTE: The foregoing should not be construed as being related in any way to the procedures which apply when a two-way radio failure occurs.

✓ EXECUTIVE ORDER: ESTABLISHING AN AIRSPACE RESERVATION OVER THE SAVANNAH RIVER PLANT, AUGUSTA, GEORGIA.

By virtue of and pursuant to the authority vested in me by Section 4 of the Air Commerce Act of 1926, the airspace above the following-described portion of the United States is hereby reserved and set apart for national defense and other governmental purposes as an airspace reservation within which no person shall navigate an aircraft except by authority of the United States Atomic Energy Commission:

All that area within the United States lying within the following described boundaries: Beginning at lat 33-22-45 N, long. 81-24-30 W; S to lat. 33-14-30 N, long. 81-24-00 W; southerly to lat 33-08-30 N, long. 81-22-36 W; SW to lat 33-05-00 N, long. 81-32-00 W at Millettville, S. Car.; WSW to lat 33-02-40 N, long. 81-42-48 W at Girard, Ga.; NW along the old Savannah-Augusta Highway to Telfairville, Ga. at lat 33-05-18 N, long. 81-48-48 W; NNW to lat 33-25-00 N, long. 81-53-30 W; NE to lat 33-27-30 N, long. 81-48-55 W; due E to long. 81-33-55 W; SE to lat 33-22-45 N, long. 81-24-30 W, point of beginning.

Any person navigating an aircraft within this airspace reservation in violation of the provisions of this order will be subject to the penalties prescribed in the Civil Aeronautics Act of 1938, as amended.

Harry S. Truman

Effective Date: October 3, 1951

✓ INSTRUMENT APPROACH PROCEDURES: The standard instrument approach procedures for the following airports have been CANCELLED: Low Frequency Range: Bryan Texas, Bryan AFB, effective Aug. 15, 1951; New Orleans, La., New Orleans Arpt., effective Aug. 27, 1951; Philadelphia, Pa., North Philadelphia Arpt., Procedure No. 2, effective July 31, 1951. VHF Visual-Aural (VAR) Range: Massena, N.Y., Richards Arpt., effective July 31, 1951; Watertown, N.Y., Watertown Arpt., effective July 31, 1951. VHF Omnirange (VOR): Bryan, Texas, Bryan AFB, effective Aug. 15, 1951; Columbia, Mo., Columbia Arpt., effective June 20, 1951; Tucumcari, N. Mex., Tucumcari Arpt., effective Aug. 15, 1951.

✓ AIR ROUTE TRAFFIC CONTROL BOUNDARY: Effective October 2, 1951, the BOSTON MONTREAL Air Route Traffic Control Area Boundary is established 25 mi NE of Burlington, Vt. on Blue 18.

✓ AERONAUTICAL CHART CORRECTIONS: Correct Aeronautical Charts as follows:

(1) RF Chart 25, dated August 1, 1951 at Williamsport, Pa. to include 122.2 mc.

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Vol. 5, No. 2 dated June 15, 1951 as follows:

(1) Page 12. Change Billings, Montana WB number to 5-5431 and INSAC number to 5-5053
(2) Page 13. Change Selinsgrove, Pa., INSAC number to: 7222.
(3) Page 14. Change Burlington, Vt., INSAC number to: 2-2842.

✓ CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective 0001 EST October 1, 1951, unless otherwise advised, civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Blue civil airway No. 39 (Bristol, Tenn. to United States-Canadian Border) is amended by changing last portion of airway to read: "From the Syracuse, N.Y., omnirange station to the Watertown, N.Y., omnirange station via the direct enroute radials; from the Watertown, N.Y., omnirange station via the intersection of the Watertown omnirange 33° True enroute radial and the Massena omnirange 241° True enroute radial to the Massena, N.Y., omnirange station; from the Massena, N. Y., omnirange via the Massena omnirange 38° True enroute radial to the United States-Canadian Border."

CONTROL AREAS: (1) Blue civil airway control areas is amended by changing caption to read: "Bristol, Tenn. to United States-Canadian Border".

(2) Control area extension (Valpariso, Fla.) is added to read: "From the Valpariso, Fla., Eglin AFB radio range station extending 5 miles on the west side and 2 miles on the east side of the north course of the Eglin AFB radio range to Red civil airway No. 30, and extending 5 miles either side of the south course of the radio range to the Eglin AFB Airspace Warning Area."

(3) Control area extension (Columbus, Ga.) is amended by adding the following portion to present control area extension: "and within 5 miles either side of the front and back courses of the ILS localizer at Muskogee County Airport, Columbus, Ga., extending from Red civil airway No. 84 on the northeast to Red civil airway No. 84 on the southwest."

CONTROL ZONES: (1) Valpariso, Fla., control zone is amended by adding the following to present control zone: "within a 5 mile radius of Eglin AFB, Valpariso, Fla., extending 2 miles either side of the north course of the Eglin AFB radio range to the southern boundary of Red civil airway No. 30."

REPORTING POINTS: Blue civil airway No. 39 (Bristol, Tenn., to United States - Canadian Border) is amended by adding the following compulsory reporting points to present reporting points: "the Syracuse, N. Y., omnirange station; the Watertown, N.Y., omnirange station; the Massena, N. Y., omnirange station."

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
★ - New or revised radio data to be inscribed on charts or added to records.
NOTE: - Because of space limitation such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (7-25)
ANNISTON ARPT: Strips being extended. Avoid new extensions. (7-16)
BIRMINGHAM-RADIO: June 25, omnirng shut down-relctn.
**BIRMINGHAM ARPT-TOWER: About Oct 1, CAA ILS will be shut down until approx Nov 1-modernization. Mrkrs and compass locators will cont to oper during this period. (9-6)
Fld: 40' lgtd ant. pole erected 775' NE of apch end and 400' rgt of centerline of ILS rnwy and 75' N of centerline of perimeter taxi strip parallel to ILS rnwy. (9-11) 2-way rdo rqrd ngts, rcvr days. (9-7) No Navy acft svcg avail from lcl sunset to 0800 CST. Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)
BROOKLEY AFB (MOBILE): Acft making VFR descent to Brookley under low visibility conditions will let down S of Mobile to avoid Bates Fld and G-6 Arwy tfc. (1-29)
DOTHAN-NAPIER FLD: Ctn-vehicles on rnwys. (8-20)
EVERGREEN-RADIO: Omnirng figt-checked, radials 240° clockwise thru 280° displaced counter clockwise 1°. Crs displacement in cone area slightly greater than normal. (8-13)
MAXWELL AFB (MONTGOMERY)-RADIO: USAF rng crs have multiples 20 mi from stn. (5-10) En route acft contact Montgomery Rdo on VHF. (9-6)

(9-25-51)

ALABAMA: MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 8 mi S looks like arpt and lgts give impression of parallel rnwys. (9-20)
MONTGOMERY-RADIO: A maximum of one half degree in excess of allowable error will be found in E sector omnirng radials 90° and 118°. (6-14)
MONTGOMERY-DANNELLY FLD: Rnwy 3-21 clsd days First 200' clsd ngts. Equip. on rnwy. NE taxi strip clsd (const), mrkd. (9-10)
**MUSCLE SHOALS ARPT: Sept 18, 24" clear bcn, 12 rpm, and green code bcn decmsnd. 24" bcn, clear and green, 6 rpm, cmsnd.
ARIZONA: ★DAVIS MONTHAN AFB(TUCSON)-RADIO: USAF Military Arwys Stn oper cont. (9-6) No longer oper 4765 kc. (9-21)
DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. (8-27) W fld; Rnwy 17-35 temp clsd. Equip adj to Rnwy 12-30. (9-21)
LUKE AFB (PHOENIX): Ctn-extensive const all rnwys (9-10)
PRESCOTT ARPT: Strip at end Rnwy 3-21 clsd (const). Use rnwys only. (8-17)
WINSLOW-RADIO: Soon, visual-aural rng will be shut down until approx Dec 20-conversion to VOR fac. (9-21)
YUMA CO. ARPT: Maximum alt within 3 mi radius 500' above arpt. Rgt tfc Rnwys 17 and 26. Diagonal Rnwy 3-21 not to be used by civil acft. Watch for AF acft. Tow-target planes will enter tfc area flying parallel to Rnwy 26, then will turn and fly parallel to Rnwy 21 and take-off Rnwy 26. Civil acft use Rnwy 17 wind permitting. (9-11)
ARKANSAS: BRINKLEY-FEDERER MEMORIAL ARPT, SITE 37, DAL-LOU: Clsd ngts Rows of dirt on SW end NE/SW Strip, use emerg only. (9-13)
FT. SMITH ARPT: Equip. on W end E/W Rnwy. (7-24)
LITTLE ROCK-ADAMS FLD-TOWER: Transmission and reception poor on all VHF freqs S to W account obstns near temp twr until approx Oct 1. Apch ctl on rng freq 353 kc not avail until approx Oct 1. (7-30) FLD: Ctn lndg N or NE, vision of ctl twr partially obstd. (5-14) Lmtd NG svcg. (10-24) Rnwy 14-32 clsd (repairs). (8-6)
ROGERS ARPT: Rnwy lgts inop. (8-28)
TEXARKANA-RADIO: Sept 5, omnirng shut down until approx Nov 5-modernization. (9-5)
WALNUT RIDGE-RADIO: Omnirng radials 290-320° and 120-150° have severe bends and crs roughness. (3-2)
CALIFORNIA: **BAKER-BROWN FLD: Clsd (hazardous). (9-24) Data rcvd too late for inclusion in Directory of Arpts.
BAKERSFIELD-RADIO: Omnirng has slight to moderate scalloping in SE quad 80° to 123°
BAKERSFIELD-KERN CO ARPT-TOWER: Effect Sept 30, twr hrs oper will be 0600-2200. (9-17)
BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans jet acft. (8-27)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06, thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft will oper below 300' during VFR wea conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat
CAMARILLO-RADIO: About Oct 4, LF rng will be shut down for relctn to lat 34-11-24, long. 119-05-15. Concurrently fac will oper at new lctn as an H fac Freq: 359kc, ident: CAV, until approx Nov 4, when it will be converted to SRAWZ rng. Corner twrs new lctn mrkd day, ngt. (9-24)
CAMP COOKE (LOMPOC): Authorized visiting acft enter on heading of 290° at 2,000' from town of Lompoc, to avoid active firing rngs. (6-25)
CHINO-PACIFIC AIRMOTIVE ARPT: Ctn - F-51 and C-54 acft operg in vcnty. Acft parked on mat area; taxying on rnwys. (3-13)
CRESCENT CITY-RADIO: Omnirng radials 90° thru 180° to 270° usable dist 25 mi. (10-10)
CRESCENT CITY-DEL NORTE CO. ARPT: Drifting sand across W end taxi strip leading to Rnwy 11. Use rnwy for taxying only. (9-5)
DAGGETT-RADIO: About Oct, omnirng will be shut down until approx Oct 15-modernization (9-10)
EDWARDS AFB (MUROC): Lctd within a danger area. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont to fld. (4-23
**EMERALD BAY SEAPLANE BASE: CLOSED. (9-13)
FORT ORD (MONTEREY): P-lines and rising elev 1/4 mi E. Lnd only in area mrkd in white (10-24)
FRESNO AIR TERMINAL-TOWER: Effect Sept 30, hrs oper will be 0730-2330. (9-19) FLD: Open trenches and vehicles adj rnwys, taxiways. (8-28)
GEORGE AFB (VICTORVILLE): Ctn-rnwys under const. (8-3)
CALIFORNIA: ★HAMILTON AFB (SAN RAFAEL)-RADIO: USAF Mil Arwys Stn also oper on 17, 490 kc. (9-21)
HAYWARD ARPT: Rnwy 10R-28L reserved for acft with cruising speed greater than 130 mph. Rnwy 10L-28R reserved for acft with cruising speed less than 130 mph. (4-5)
INDIO ARPT: About Oct 1, fld will be abandoned. (9-17)
**LAKE HUGHES-SKY CASTLE FLD: New fld. lat 34-42-00; long, 118-23-30. (1-30)
LOS ANGELES INTERNATIONAL ARPT: Rnwy 7R-25L usable portion reduced to 4500' from apch end 25L, const across W end. Rnwy 25L clsd to take-offs and Rnwy 7R clsd lndgs 0700-1700 daily xcpt Sat and Sun. Rnwys 4-22 and 11-29 clsd (const). Equip. on and adj const area. Use paved areas only Two green transverse bar lgts mrk threshold Rnwy 25L. New rnwy extensions and W portion of fld clsd-const (mrkd). (9-18)
★MARCH AFB (RIVERSIDE)-RADIO: USAF Radar Bcn AN/CPN-6 lat 33-53-00, long. 117-15-00. Code: 2-2. Not to be used as let-down aid. (7-11)
MARCH AFB (RIVERSIDE): Formations more than 15 acft expect delay more than 1 hr. Ext const all rnwys. (8-28)
MOFFETT NAS (MTN VIEW): Max. wheel load: Rnwy 14L-32R, 40,000 lbs; Rnwy 14R-32L, 30,000 lbs. (2-21)
NEEDLES ARPT, SITE 25A, LAX-AMA: 80 octane gas not avail. (9-24)
NORTON AFB (SAN BERNARDINO): Ctn-equip. on fld days. (3-29)
OAKLAND-RADIO: Omnirng maximum usable dist, 40 mi N thru E at minimum inst alt.
OAKLAND ARPT: Channel clsd to seaplanes, LST craft moored in channel. Lgt acft use gravel area. Large acft use concrete taxiways. Const vcnty hangar 5 and lndg area from hangar 3 to W bndry. (8-16)
OCEANSIDE ARPT: Lgts inop. (9-2)
ONTARIO INTERNATIONAL ARPT-TOWER: Effect Oct 1, hrs oper will be 0800-2000.
PALMDALE-LOS ANGELES CO. ARPT: 70' unlgtd bldg 1200' NW of SW end Rnwy 22. (7-18)
SAN DIEGO-RADIO: Omnirng has lgt to moderate scalloping in all quads. (6-12) Lemon Grove FM on E crs LF rng reduced in power to 80 watts. (7-24)
SAN DIEGO (BROWN ALF): Clsd-const. (9-20)
SAN DIEGO-LINDBERGH FLD: Const on ramp adj to terminal bldg. (8-14)
SAN DIEGO NAS: Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft lnd on hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious Base, tfc lanes at North Island. (2-21)
SAN DIEGO-NAS SEAPLANE BASE: Sealane mrkrs under const. Perm pile-mounted day mrkrs and seadrome lgts are being installed in S San Diego Bay to delineate the sealanes. There are two sealanes each 1000' wide, extending NW/SE 14,875', E/W 9,872'. Bndrys and ends of lanes mrkd, day, ngt. Ctn during lndg and take-off. It is also noted that due to mrkrs being pile-mounted the height above water will vary with the state of the tide.
SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6) Civil pilots use extreme ctn when flying near Hamilton AFB due to extreme rate of closure between jet acft and small civil acft. (1-17)
★SAN FRANCISCO ARPT-TOWER: CAA ILS back course unusable. Front course slight scalloping. These data rcvd too late for inclusion on ILS page. (9-24) FLD: Apch lgts inop. Rnwys clsd days intermittently. Taxi with ctn. Equip. on fld days. (6-27)
SANTA ANA MCAF-LTA: Hrs opern: 0800-1630, Mon-Fri, 0800-1200 Sat and daily to sunset on 30 min notice. (7-20)
SANTA BARBARA ARPT: Taxiway 3 between intsxn with Taxiway 4 and apch end Rnwy 25 perm clsd to acft with 20,000 lbs or more gross wt. (8-20)
SANTA MONICA ARPT: Rnwy 4-22 clsd. (9-4)
SONORA-COLUMBIA ARPT: NW/SE Strip clsd. (9-17)
COLORADO: SPECIAL NOTICE: Lndg of acft on highways in vcnty of John Martin Reservoir and Dam below Hasty Dam prohbited. Lndg of acft prohibited on Govt property in vcnty of John Martin Reservoir and Dam unless prior permission obtained from U.S. Army Dist Engr. John Martin Dam lctd 1 mi SSE of Hasty, Colo. (9-20)
COLORADO SPRINGS: Small arms, mortar and artillery firing being conducted in entire area of Camp Carson Military Reservation during all hrs thru Sept 30, 1951. Area extends from lat 38-45-00 on N to lat 38-30-00, on S, and from long. 104-43-00 on E, to State Hwy No. 115 on W. FORT MILES: Overwater Controlled Firing Area in vcnty formerly approved on a seasonal basis, is now rqrd on a yearly basis. Area is described as follows: Beginning at lat 38-45 30, long. 75-01-24; SE to lat 38-43-00, long. 74-57-10; SSE to lat 38-38-50, long. 74-55-33 W to lat 38-37-54, long. 75-03-50; northerly along the shoreline at lat 38-40-45, long. 75-04-09; NE to point of beginning. Time of Use: May to Oct 1300-1900, Nov to Dec 0800-1730. Activities: Anti-acft firing. Controlling Agency: 2nd Army, Ft. Miles, Dela. Effective Date: Jan 5, 1951.
GEORGETOWN-SUSSEX COUNTY ARPT: Heaves in pavement Rnwys 4-22, 16-34. (8-27)
WILMINGTON-NEW CASTLE CO. ARPT: Jets and other mil acft operg daily. Two 465 unlgtd bridge twrs erected across Delaware Riv 4 mi ENE. (7-16) Rnwy 9-27 clsd days-const. Excavation adj both ends of rnwy (mrkd). Use only by direction from twr. (9-24)
DIST. OF COLUMBIA: SPECIAL NOTICE: Attention must again be brought to pilots operating in the Washington National Airport Area regarding close adherence to the established traffic patterns. The CAA is receiving an alarming increased number of complaints regarding "Noise Nuisance" from communities in the vicinity, especially from Alexandria. It is felt that some of these complaints are justified in view of the many reports of low flying from communities some distance from the airport. The Administrator of Civil Aeronautics is desirous of having all pilots use the maximum permissable altitudes rather than the 1200' minimum in the proper pattern procedures on approaching Washington National Airport.
ANACOSTIA NAS-RADIO: Navy VHF/DF inop - repairs. (4-30)
BOLLING AFB: Lmtd trans quarters. (7-12) Clsd jet acft xcpt emerg. (9-21)

IMPENDING CHANGES IN AERONAUTICAL DISTANCE AND SPEED UNITS

All CAA air-ground communications within the continental United States and Alaska will change over to the use of nautical miles for horizontal distance and visibility and knots for horizontal speed on July 1, 1952. These changes are necessary in order to conform to international practices.

Basically, a nautical mile is the length of a minute of latitude at sea level, or the length of a minute of longitude at sea level at the equator. This distance is 6,080.20 feet, as compared to 5,280 feet for the common or statute mile. Since the ratio 6,080/5,280 is equal to 1.15, and the ratio 5,280/6,080 is equal to .87, it is apparent that the number of statute miles is 115% of the number of nautical miles, or the number of nautical miles is 87% of the number of statute miles. Furthermore, if the fraction 6,080/5,280 is reduced to lowest terms, we obtain 38/33, indicating that 38 statute miles are equal to 33 nautical miles.

Furthermore, practically all air navigational computers provide quick and easy conversions of nautical miles to statute miles, or vice versa, so no difficulties should be experienced by anyone who will attempt to inform himself as to the relationship of the units and with at least one of the various methods of conversion. Attention is specifically called to the fact that the knot is a unit of speed and not a unit of distance, being equal to nautical miles per hour.

Conversion Tables for Statute and Nautical Miles
(To the nearest hundredth)

1 nautical mile = 6,080.20 ft. 1 statute mile = 5,280.00 ft.

Statute - Nautical		Nautical - Statute	
1	0.87	1	1.15
2	1.74	2	2.30
3	2.61	3	3.45
4	3.47	4	4.61
5	4.34	5	5.76
6	5.21	6	6.91
7	6.08	7	8.06
8	6.95	8	9.21
9	7.82	9	10.36
10	8.68	10	11.52
20	17.37	20	23.03
30	26.05	30	34.55
40	34.74	40	46.06
50	43.42	50	57.58
60	52.10	60	69.09
70	60.79	70	80.61
80	69.47	80	92.12
90	78.16	90	103.64
100	86.84	100	115.16

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communications Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
✓ = New facilities or name changes, see page 20

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . ..Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS . . .Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. .Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . Range (loop radiators), power less than 50 watts
MM. ..VHF middle marker
MOR.. Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL .. Range (loop radiators), power 50 or more, but less than 150 watts
OM. . .VHF outer marker
P. . . . Point-to-Point radio.
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W . . Without voice facilities on range frequency
Z . . . .VHF station location marker at a range station.

RADIOTELEGRAPH CODE

A - ABLE	•—	F - FOX	••—•	K - KING	—•—	P - PETER	•——•	U - UNCLE	••—	Z - ZEBRA	——••

FREQUENCY LEGEND

V = 135.9 and 135.0 mc transmitted.
# = Guards same VHF frequencies station transmits except 122.2 mc and 135.0 mc.
(1) = 3105,4495 kc guarded
(2) = 3105, 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7, 135.9 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-135.9, 122.1 = guards every frequency in group (3) except 135.9 and 122.1

NOTES

1. Range courses are magnetic in bearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VOR or VAR is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

(10-9-51)

ALWAYS CHECK NOTICES TO AIRMEN SECTION

RADAR AVAILABLE : How and Where

PAR = PRECISION APPROACH RADAR. ASR = AIRPORT SURVEILLANCE RADAR.
GCA = GROUND CONTROLLED APPROACH - MILITARY EQUIVALENT OF COMBINED ASR AND PAR EQUIPMENT

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway: The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for this type of approach are at least as high as, and in some instances higher than, the regular circling minimums listed in the Flight Information Manual for the airport.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Flight Information Manual.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at the pilot's discretion.

After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible.

Civil minimums at military installations estabilshed by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.

Alt MSL=Min. alt. over airport.

(D) = Day. (N) = Night. ➤ =New or revised data. ✓ = New facilities or name changes.

CAA RADAR UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL CAA UNITS GUARD THE VHF FREQUENCIES TRANSMITTED PLUS 3105, 4495 kc AND 122.5 mc. IN ADDITION TO THE FREQUENCIES LISTED, THEY TRANSMIT ON: 118.1, 121.5, 126.18 mc.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U. S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U. S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	C	-Commercial	MG	-Misc. Govt
A	-Army (May also be used by Army Nat'l Guard)	CG	-Coast Guard	N	-Navy
		I	-Intermediate	NG	-Air Nat'l Guard
		M	-Municipal	P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon) (Green and white, split-beam and other types) Omission of B indicates rotating light is either not available or not operating standard hours (sunset-sunrise).

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Portable lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway or Strip
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage

S2: Storage, minor aircraft repairs

S3: Storage, minor aircraft, and minor engine repairs

S4: Storage, major aircraft, and minor engine repairs

S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least

F2: 87 oct., and lower

F3: 91 oct., and lower

F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.

A : 100/130 oct.

B : 91/96 oct.

C : 73/80 oct.

J : JP - 1

J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(k) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(l) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Usually unattended, offer no public service and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORTS ON WHICH CAA RECORDS ARE NOT YET AVAILABLE							

F-fuel octane. New or revised data. (See Legend Page 21)

(10-9-51)

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commanding Officer, USAF Aeronautical Chart & Information Service, Washington 25, D. C.; Attn: Aeronautical Information Division.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters USAF ACIS.

In connection with the above, the attention of all base operations officers is invited to A. F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A. F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, COAST GUARD AND ARMY: Listed below are Standard VHF Channels for the Air Force, Navy, Coast Guard and Army.

AIR FORCE*	NAVY ARC-3, -5 SCR-522**		ARMY	SERVICE
A...xmit 135.90 rcvg 135	1...135.90			CAA Airway (Range Station)
		A...121.5	121.5	Military Emergency

COAST GUARD: 1...( ); 2...135.9/135; 3...142.74; 4...142.02; 5...132.3; 6...( ); 7...143.28; 8...143.64; 9...126.18; 10...( ) 11...120.3 (ARTC Centers); 12...as required; 13...(CAA aerodrome gnd ctl) or as required; 14...(CAA aerodrome gnd ctl) or as required; 15-16-17-18 as required; Guard 121.5

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion; Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**In 4 channel equipment (ARC-5 and SCR-522) 132.3 mc or 142.02 mc may be substituted on Channel C and D in accordance with operational requirements.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A. N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

(10-9-51)

√ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, Calif.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala., McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; Westover AFB, Mass.; or Mitchel AFB, N. Y.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C. March AFB, Calif.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich., Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by Aeronautical Chart and Information Service and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing station, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listing given in paragraph 5 of this regulation. Base operations officers, weather and communication units should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11); M-59, November 5, 1949 (Service "B").

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fifth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of Dec 27, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, January 9, 1951; Teletype Maps: M-11 December 1, 1949, and M-14, April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C", and "O").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with Revision 6. (Revisions 1-5 obsolete). Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

Requests for distribution should be directed to Commanding Officer, Aeronautical Chart and Information Service, Washington 25, D. C. Attn: Aeronautical Information Division.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

COMPULSORY REPORTING POINTS- VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UHF CHANNELIZATION: An initial UHF channelization plan has been approved for USAF and USN UHF-equipped aircraft in the U. S. and will be published in subsequent issues of the Radio Facility Charts. UHF frequencies which are being first implemented at USAF stations on a continuing program beginning 1 July 1951 are:

Channel 1	Control tower (military primary)	236.6 mc
" 15	Military Airways	258.20 mc
" 17	GCA	335.80 mc
" 18	GCA	289.40 mc
Guard	Military emergency	243.00 mc

It is contemplated that CAA stations, towers and centers will provide service on UHF. The channels to be used and the date that the services are to be available will be published later.

✓CHANGES FOR PILOT'S HANDBOOK (EAST) U.S.: (1) AL-117, dtd Apr 26, 1951. Des Moines, Iowa. Change missed approach to: If visual contact not established at authorized landing minimum within 2.2 mi after passing Des Moines Range or if landing not accomplished immediately, turn left and climb to 2600' on W crs. Add Caution Note: 1549' TV twr 3.2 mi NNE arpt.

(2) AL-264, dtd Oct 17, 1950. Minneapolis-St.Paul Intn'l Arpt, Minneapolis, Minn. Change arpt elevation to 840'. Change Initial Approach -N crs 2500' from DLH Range Station. SW crs 2200'from Int S crs Willmar. Change Procedure Turn to: N side SE crs 2100' within 15 mi, 2400' within 25 mi. Change mag crs from MSP range to arpt 289°, 3.4 mi. Change missed approach to: If visual contact not established at authorized landing minimums within 3.4 mi after passing Minneapolis LF range or if landing not accomplished, climb to 2500' on NW crs to Hamel FM. ALTERNATE PROCEDURE (when directed by ATC) 1. Make left climbing turn to 2200' proceding out SW crs Minneapolis LF range to Jordan FM. 2. Make left climbing turn to 2100' returning to Minneapolis LF rng.

(3) AL-151, dtd June 1, 1951. Godman AFB, Fort Knox, Ky. Delete from Pilot's Handbook. LF radio range FTK converted to homing facility.

✓CHANGES FOR PILOT'S HANDBOOK (WEST) U.S.: (1) AL-117, dtd Apr 26, 1951. Des Moines, Iowa. Change missed approach to: If visual contact not established at authorized landing minimums within 2.2 mi after passing Des Moines Range or if landing not accomplished immediately, turn left and climb to 2600' on W crs. Add Caution Note: 1549' TV twr 3.2 mi NNE arpt.

(2) AL-264, dtd Oct 17, 1950. Minneapolis-St. Paul Intn'l Arpt, Minneapolis, Minn. Change arpt elevation to 840'. Change Initial Approach - N crs 2500' from DLH Range Station. SW crs 2200' from Int S crs Willmar. Change Procedure Turn to: N side SE crs 2100' within 15 mi, 2400' within 25 mi. Change mag crs from MSP range to arpt 289°, 3.4 mi. Change missed approach to: If visual contact not established at authorized landing minimums within 3.4 mi after passing Minneapolis LF range or if landing not accomplished, climb to 2500' on NW crs to Hamel FM. ALTERNATE PROCEDURE (when directed by ATC) 1. Make left climbing turn to 2200' proceding out SW crs Minneapolis LF range to Jordan FM. 2. Make left climbing turn to 2100' returning to Minneapolis LF rng.

(3) AL-164, dtd Nov 24, 1949. Galveston, Texas. Change Procedure turn to: W side of NW crs 1300' within 15 mi, NA beyond 15 mi.

(4) AL-440, dtd Oct 27, 1950. Walla-Walla, City County Arpt, Wash. Change Procedure Turn to W side NE crs 3500' within 15 mi, NA beyond 15 mi.

(5) AL-343, dtd Mar 26, 1951. Rapid City AFB, S.D. Change initial approach to: E crs 4400' from Phillip H or VOR, S crs 5500' from Chadron H.

(6) AL-500, dtd June 22, 1951. Edwards AFB, Muroc, Calif. Effective Oct 15, ident LF rng will be changed to EDW.

(10-9-51)

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised on hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, Washington 25, D.C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Airman's Guide.

CIVIL USAGE OF MILITARY FIELDS: U.S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data or data impossible to incorporate in the two above tabulations.

DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The locations at which this direct communications procedure is available are listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing.

VERY HIGH FREQUENCIES FOR PRIVATE PILOTS: Use of very high frequency channels by the majority of private pilots has heretofore been limited to the channels 121.5, 122.1, 122.5 and 122.8 mc. Now, however, any private pilot having need for additional channels may apply to the FCC for use of any of the 40 channels in the 118.1 to 126.7 mc band. To determine their additional requirements, pilots should consult the Airman's Guide (Radio Facilities Section) or contact the nearest CAA regional office for information concerning the channels which have been implemented at the various locations. Of particular interest may be the channel 126.7 mc which was previously limited to use by air carriers for communication with CAA stations (INSACS) but now may be used by any private pilot if required for that purpose.

DVFR FLIGHT PLANS: When an IFR flight plan is canceled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

AERONAUTICAL ADVISORY STATIONS (FREQUENCY 122.8 mc): This requency is known in some areas as the "private flyers frequency" and also as "UNICOM". Licenses for ground stations and aircraft are now being issued by the FCC subsequent to receipt of application for license from private pilots and airport operators eligible to use the frequency. Under the FCC rules, private aircraft may use 122.8 mc for communication with aeronautical advisory stations and between private aircraft themselves while in flight. Particular attention is invited to Section 9.1001 which follows:

"9.1001 Eligibility for station license. Authorizations for aeronatuical advisory stations will be issued only to the owner or operator of a landing area, not served by an airdrome control station. Only one Aeronautical Advisory station will be authorized at a landing area".

The scope of service to be rendered under FCC rules for the ground station is:
"9.1004 Scope of service. (a) Communications shall be limited to the necessities of safe and expeditious operation of aircraft. The service shall be advisory in nature, pertaining to the condition of runways, types of fuel available, wind conditions, available weather information or other information necessary for aircraft operations. (b) Aeronautical Advisory stations shall not be used for the control of aircraft."

The following locations have been reported as having Aeronautical Advisory Service available:

Bloomsburg Arpt, Pa. (0800-2300)
Concord Arpt, N.H. (daylight hours)
Davenport Arpt, Iowa (0730-2000)
Claremont Arpt, N.H. (daylight hours)
Flat Rock-Nan-Bar Arpt, Mich. (0800-sunset and hrs prior req.)
Keene-Dillant-Hopkins Arpt, N.H. (daylight hours)
Lima Arpt, Ohio (0800-sunset)
Laconia Arpt, N.H. (daylight hours)
Lebanon Arpt, N.H. (daylight hours)
McAllen Arpt, Texas (0800-1900)
Muncie Arpt, Ind. (daylight hours)
Odessa, Tex.-Ector Arpt (0800-dark)
Revere Arpt, Mass. (0900-sunset)
Nashua Arpt, N.H., Borie Fld (daylight hours)
Vineland, N.J.-Kroelinger Arpt, (daylight hrs)
Marietta, Ga., Parkaire Fld.

Airport operators interested in providing this service may obtain further details from the nearest FCC or CAA field office.

AIR TRAFFIC CLEARANCES: The initial traffic clearance issued to an aircraft prior to departure will normally authorize flight to the point of first intended landing, with instructions to maintain the altitude at which the aircraft enters the next control area. The pilot should request any desired altitude changes en route. Better service can be given the pilot if any altitude change is requested at the time the change is desired. An amendment to the initial clearance may be issued to a flight at any time the air traffic controller deems such action necessary to avoid possible confliction between en route, landing, or departing aircraft. A flight is always cleared to a specific point or location (radio or visual reporting point), defined as a clearance limit. If the assigned altitude is below the minimum for a subsequent portion of the flight and radio failure is experienced, the procedures outlined under TWO-WAY RADIO FAILURE must be followed to insure proper terrain clearance.

Whenever an aircraft has been cleared to a point other than the destination airport it is the responsibility of Air Traffic Control to issue whatever further clearance is appropriate at least five minutes before the aircraft arrives at the clearance limit, unless holding instructions and a time at which the pilot may expect further clearance have been received and acknowledged by the pilot. In the event a pilot arrives at a clearance limit without having

received either a clearance beyond or holding instructions at such fix, he should immediately request further clearance and hold at the clearance limit, maintaining the last assigned altitude, until further clearance is received. When a clearance limit is a point other than the destination airport, the altitude of the aircraft at this clearance limit will be protected so that separation will exist in the event the aircraft must hold awaiting further clearance. NOTE: The foregoing should not be construed as being related in any way to the procedures which apply when a two-way radio failure occurs.

√INSAC VHF REPLY TO PRIVATE AIRCRAFT: The new national ground-to-air call-up and reply channel for communication with private aircraft, 122.2 mc was implemented at certain INSACs on August 1, 1951. Eventually, all INSACs will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACs which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current NOTAMS for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call. When an INSAC is unable to reply on the VHF range voice channel because of equipment failure or maintenance shutdown, reply will be made on 121.5 mc. A small number of INSACs have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, the should request reply on 121.5 mc.

√LOCAL MAGNETIC DISTRUBANCE: Recent pilot reports indicate westerly magnetic variation as much as 30° over wide area from Natchez, Miss. to Winnsboro, La. at altitudes as high as 6000'.

√AIR ROUTE TRAFFIC CONTROL BOUNDARY AMENDMENTS: Effective immediately the following air route traffic control boundaries are amended:

SEATTLE-VANCOUVER Air route traffic control area boundary on Blue Airway 32 is relocated to a point 15 mi S of Patricia Bay, B.C.

ATLANTA-JACKSONVILLE on Red 10 is relocated to 25 mi SE of the intsxn of the NE crs of Augusta, Ga. rng and the NW crs of Charleston, S.C. rng.

√INSTRUMENT APPROACH PROCEDURES: The following standard instrument approach procedures have been CANCELLED: Low Frequency Radio Range: Ephrata, Wash., Ephrata Arpt. VHF Omnirange: Casper, Wyo., Natrona Co. Arpt.

√DANGER AREA DESIGNATIONS: The following Danger Area amendment shall be effective as dated, unless otherwise advised:

AMENDMENT 85 (October 6, 1951)

(1) A Fort Huachuca, Arizona, area is added to read: Location: Fort Huachuca (Douglas Chart); Description: Beginning at lat. 31-36-40, long. 110-26-40; NE to lat. 31-41-40, long. 110-15-00; due E to long. 110-13-30; SE to lat. 31-40-30, long. 110-11-00; due S to lat. 31-36 40; SW to lat. 31-33-20, long. 110-18-20; SE to lat. 31-31-00, long. 110-16-10; WSW to lat. 31-30-00, long. 110-25-40; NW to lat. 31-31-40, long. 110-26-40; due N to lat. 31-36-40, long. 110-26-40, point of beginning; Altitudes: Surface to 22,500' MSL; Time: Daily, 0700 to 1800; Using Agency: 6th Army, Ft. Huachuca, Arizona.

(2) A Yuma, Arizona area is added to read: Location: Yuma (San Diego and Phoenix Ch Charts); Description: Beginning at lat. 33-00-00, long. 113-52-00; due S to lat. 33-55-45, WSW to lat. 32-51-15, long. 114-31-00; due N to lat. 33-00-00; due E to lat. 33-00-00, long. 113-52-00, point of beginning; Altitudes: Surface to 50,000 ft.; Time: Continuous; Using Agency: 6th Army, Yuma Test Station, Yuma, Arizona.

(3) The Salton Sea, Calif. area published on April 21, 1949, in 14 F. R. 1913 is revised to read: Location: Salton Sea (San Diego Chart); Description: (1) A circular area having a radius of 3 miles centered at lat. 33-11-00, long. 116-09-30; Altitudes: Surface to 15,000'; Time: Continuous; Using Agency: 11th Naval District, San Diego, Calif.,

(2) Description: Beginning at lat. 33-18-00, long. 115-44-00; due S to lat. 33-11-00; due W to long. 115-49-40; NW to lat. 33-11-30, long. 115-50-30; NNW to lat. 33-18-00, long. 115-53-20; due E to lat. 33-18-00, long. 115-44-00, point of beginning; Altitude: Unlimited; Time: Continuous; Using Agency: National Defense Agencies.

(3) A circular area having a radius of 1-1/2 miles centered at lat. 33-21-45, long. 115-49-37; Altitude: Unlimited; Time: Continuous; Using Agency: 11th Naval District, San Diego, Calif.

(4) A Shaw Air Force Base, Sumter, S. C. area is added to read: Location: Shaw Air Force Base, Sumter (Savannah Chart); Description: Beginning at lat. 33-52-30, long. 80-26-00; southerly to lat. 33-45-50, long. 80-25-00; WSW to lat. 33-44-15, long. 80-33-15; NNW to lat. 33-48-00, long. 80-34-00; NE to lat. 33-52-30, long. 80-30-00; due E to lat. 33-52-30, long. 80-26-00, point of beginning; Altitudes: Surface to 25,000 ft.; Time: Daylight hours, 7 days a week (when ceilings of at least 3000' and visibility of at least 3 miles prevail); Using Agency: Shaw AFB, Sumter, S. C.

(5) The Camp Forrest, Tennessee area published on December 22, 1949, in 14 F. R. 7641 is deleted.

(6) The Humuula, Island of Hawaii, Territory of Hawaii, area, published on Oct. 15, 1949, in 14 F. R. 6287, and amended on April 29, 1950, in 15 F. R. 2435 is further amended by changing the "Time of Designation" column to read: "Daylight and darkness".

√NON-STANDARD HOLDING PATTERNS: Effective immediately the following non-standard holding patterns are added, deleted or amended:

(1) Add - Denver, Colo. VAR; direction from holding point - S; direction of turn - RIGHT on E side of S crs; time - one minute.

(2) Add - Aurora, Colo. H facility; direction from holding point - S; direction of turn - RIGHT on E side of S crs of Denver (LF) rng; time - one minute.

(3) Add - Des Moines, Iowa (LF) rng; direction from holding point - S; direction of turn - RIGHT on E side of the S crs; time - one minute.

(4) Add - Martensdale, Iowa (FM); direction from holding point - S; direction of turn - RIGHT on E side of the S crs of Des Moines rng; time - one minute.

(5) Change the Denver, Colo. (LF) rng pattern time to one minute.

(6) Delete the Watkins, Colo. intsxn pattern.

√COMPULSORY AND ON-REQUEST REPORTING POINTS: Effective immediately the following on-request reporting points are established:

(1) CAT INTERSECTION - intsxn NE crs New Orleans, La. rng and SW crs of Keesler, Miss. rng

(2) HORN INTERSECTION - intsxn SE crs Keesler, Miss. rng and SW crs Mobile, Ala. rng.

Effective October 30, 1951, the following compulsory reporting point is established:

(1) CURTIS INTERSECTION - intsxn E crs Akron, Colo. (LF) rng and S crs North Platte, Neb. (LF) rng.

√AERONAUTICAL CHART CORRECTION: Correct geographical position of Flippin, Ark. on reverse Tulsa sectional chart to read as follows: Lat. 36-17-00, long. 92-35-00.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

NOTE: - Because of space limitation such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

(10-9-51)

ALABAMA: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (7-25)
ANNISTON ARPT: Strips being extended. Avoid new extensions. (7-16)
BIRMINGHAM-RADIO: June 25, omnirng shut down-relctn.
BIRMINGHAM ARPT-TOWER: Soon, CAA ILS will be shut down until approx Nov 1-modernization. Mrkrs and compass locators will cont to oper during this period. (9-6) FLD: 2-way rdo rqrd ngts, rcvr days. DIST. OF COLUMBIA: DISTRICT OF COLUMBIA-SPECIAL NOTICE: Attention must again be brought to pilots operating in the Washington National Airport Area regarding close adherence to the established traffic patterns. The CAA is receiving an alarming increased number of complaints regarding "Noise Nuisance" from communities in the vicinity, especially from Alexandria. It is felt that some of these complaints are justified in view of the many reports of low flying from communities some distance from the airport. The Administrator of Civil Aeronautics is desirous of having all pilots use the maximum permissable altitudes rather than the 1200' minimum in the proper pattern procedures on approaching Washington National Airport.

ANACOSTIA NAS-RADIO: Navy VHF/DF inop - repairs. (4-30)

BOLLING AFB: Lmtd trans quarters. (7-12) Clsd jet acft xcpt emerg. (9-21)

CONTROL AREA AND CONTROL AREA EXTENSION AMENDMENTS: Effective October 6, 1951, control areas and control area extensions were amended as follows:

CONTROL AREAS: Red civil airway No. 16 control area (Tallahassee, Fla. to Florence, S. C.) is amended by changing last portion to read: from the columbia, S. C. omnirng stn to the Florence, S. C. omnirng stn via the intsxn of the Columbia, S. C. omnirng 90° true enroute radial and the Florence, S. C. 226° true enroute radial, excluding the portion which overlaps the Ft. Jackson danger area.

CONTROL AREA EXTENSIONS: Control area extension (Sumter, S. C.) is amended by adding the following to present control area extension: excluding the portion which overlaps the Shaw Danger Area.

CONTROL AREA EXTENSIONS: Control area extension (Columbus, Ga.), is amended by changing last portion to read: "and within 5 miles either side of a line bearing 235° True through the Muscogee County Airport, Columbus, Ga., outer compass locator extending from Red civil airway No. 84 on the northeast to Red civil airway No. 84 on southwest.

CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective 0001 EST, October 30, 1951, civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Green civil airway No. 4 (Los Angeles, Calif. to Philadelphia, Pa.) is corrected by changing "El Morro, N. Mex. rdo rng stn" to read: "Zuni, N. Mex. rdo rng stn".

(2) Amber civil airway No. 2 (Long Beach, Calif. to Point Barrow, Alaska) is amended after "Delta, Utah rdo rng stn" by deleting the portion which reads: Fairfield, Utah rdo rng stn; the intsxn of the NE crs of the Fairfield, Utah rdo rng and the S crs of the Salt Lake City, Utah rdo rng"; and by adding in lieu thereof; the intsxn of the NE crs of the Delta, Utah rdo rng and the S crs of the Salt Lake City, Utah rdo rng.

(3) Amber civil airway No. 8 (Los Angeles, Calif. to The Dalles, Oreg.) is amended by deleting the following portion: Santa Barbara, Calif. VHF rdo rng stn; the intsxn of a line bear. 302° true from the Santa Barbara VHF rdo rng and the SE crs of the Paso Robles VHF rdo rng and by adding the following portion in lieu thereof: Santa Barbara, Calif. rdo rng stn; the intsxn of a line bear. 302° true from the Santa Barbara, Calif. rdo rng and the SE crs of the Paso Robles VHF rdo rng.

(4) Red civil airway No. 6 (Las Vegas, Nev. to Omaha, Nebr.) is amended by deleting the following facility: "The Hayes Center, Nebr. rdo rng stn."

(5) Red civil airway No. 111 is added to read: (U. S. Canadian Border to Massena, N. Y.) From the intsxn of the Massena, N. Y. omnirng 318° true enroute radial and the U. S. Canadian Border to the Massena, N. Y. omnirng stn.

(6) Blue civil airway No. 2 (Montgomery, Ala. to Erie, Pa.) is amended by changing name of facility from Elkins, W. Va. rdo mrkr stn to Elkins, W. Va. rdo rng stn.

CONTROL AREAS: (1) Green civil airway No. 3 (San Francisco, Calif. to New York, N. Y.) is amended before Ft. Bridger, Wyo. omnirng stn by adding a portion to read: from the Ogden, Utah omnirng stn to the Ft. Bridger, Wyo. omnirng stn via the direct en route radials.

(2) Green civil airway No. 7 (Nome, Alaska to Fairbanks, Alaska) is amended by adding a first portion to read: From the Nome, Alaska rdo rng stn to a line extended at right angles across such airway thru a point 50 miles E of the rng stn.

(3) Amber civil airway No. 1 (United States Mexican Border to Nome, Alaska) is amended by adding the following to present control area: From a line extended at right angles across such airway thru a point 50 miles SE of the Nome, Alaska rdo rng stn to the Nome, Alaska rdo rng stn.

(4) Amber civil airway No. 6 (Jacksonville, Fla. to United States-Canadian Border) is amended by deleting the words which read: excluding that portion which overlaps the Camp Forrest danger area.

(5) Red civil airway No. 1 (Portland, Oregon to Kansas City, Mo.) is amended before the portion which reads: From the Denver, Colo. VHF VAR rdo rng stn to the Thurman, Colo. omnirng stn by adding the following portion to read: From the Kemmerer, Wyo. omnirng stn to the Rock Springs, Wyo. omnirng stn via the direct enroute and 15° N alt change radials.

(6) Red civil airway No. 111 is added to read: (United States-Canadian Border to Massena, N. Y.) All of Red civil airway No. 111.

(7) Blue civil airway No. 27 (Kodiak, Alaska to Kotzebue, Alaska) is amended by adding the following to present control area: "From the Nome, Alaska rdo rng stn to a line extended at right angles across such airway thru a point 50 miles N of the Nome, Alaska rdo rng stn."

CONTROL AREA EXTENSIONS: Control area extension (St. Joseph, Mo.) is amended to read: All that area within a 25 mile radius of the St. Joseph, Mo. rdo rng stn in the NW and SW quadrants of the rdo rng excluding the portion which overlaps the Kansas City, Mo. control area.

(2) Control area extension (San Francisco, Calif.) is amended by adding the following to present control area extension: "and including all that area NE of the San Francisco rdo rng stn bounded on the NW by Green civil airway No. 3, on the E by Blue civil airway No. 7 and on the S by Red civil airway No. 60."

(3) Control area extension (Colorado Springs, Colo.) is added to read: All that area within a 25 mile radius of the Colorado Springs, Colo. rdo rng stn in the NE and SE quadrants of the rdo rng.

(4) Control area extension (Joplin, Mo.) is added to read: All that area within a 25 mile radius of the Joplin, Mo. rdo rng stn excluding the portion which overlaps the Olathe Caution Area.

CONTROL ZONES:

(1) 5-mile control zone section is amended by adding the following airports: Chandler, Ariz., Williams AFB; Nome, Alaska, Nome Arpt.

(2) West Palm Beach, Fla. control zone is amended by changing name of arpt from Morrison Field to Palm Beach International Airport.

(3) Andrews, Md. control zone is amended by adding the following to present control zone: .....excluding that portion which overlaps the Washington National Arpt control zone.

REPORTING POINTS: Green Civil airway No. 4 (Los Angeles, Calif. to Philadelphia, Pa.) is corrected by changing El Morro, N. M. rdo rng stn to read: Zuni, N. M. rdo rng stn.

(2) Amber civil airway No. 1 (United States-Mexican Border to Nome Alaska) is amended after Toledo, Wash. rdo rng stn by adding the following compulsory reporting point: McChord AFB rdo rng stn, Tacoma, Wash.

(3) Amber civil airway No. 8 (Los Angeles, Calif. to The Dalles, Oregon) is amended by deleting the following compulsory reporting point: Santa Barbara, Calif. VHF rdo rng stn and by adding in lieu thereof. Santa Barbara, Calif. rdo rng stn.

(4) Red civil airway No. 6 (Las Vegas, Nev. to Omaha, Neb.) is amended by deleting the following compulsory reporting point: Hayes Center, Neb. rdo rng stn and by adding the following compulsory reporting point: the intsxn of the E crs of the Akron, Colo. rdo rng and the S crs of the North Platte, Neb. rdo rng.

(5) Red civil airway No. 30 (Shreveport, La. to Jacksonville, Fla.) is amended after Baton Rouge, La. rdo rng stn by adding the following compulsory reporting point: Keesler AFB, Biloxi, Miss. rdo rng stn.

(6) Red civil airway No. 111 is added to read: (United States Canadian Border to Massena, N. Y.) No reporting point designation.

(7) Red civil airway No. 20 (Lansing, Mich. to Washington, D.C.) is amended by deleting the following reporting Point: the intsxn SE crs Washington, D. C. and the NE crs of the Patuxent River, Md. (Navy) rng.

(8) Blue civil airway No. 56 (Elizabeth City, N. C. to Washington, D. C.) is amended by adding the following reporting point: intsxn SE crs of Andrews, Md. rng and NE crs Tappahannock, Va. rng.

PLEASE POST!

With the advent of Air Defense Identification Zones (ADIZ) the necessity for filing flight plans while in flight has increased tremendously. To aid pilots in assembling the required information and in the proper sequence the flight plan form is herewith reproduced.

DEPARTMENT OF COMMERCE—CIVIL AERONAUTICS ADMINISTRATION

Form approved.
Budget Bureau No. 41-R073.2.

FLIGHT PLAN

FOR VFR—Complete all except shaded items. FOR IFR—Complete all items.
FOR DVFR—Complete all items except "Alternate Airport."

AIRCRAFT IDENTIFICATION NO.	COLOR OF AIRCRAFT	TYPE OF AIRCRAFT (If formation flight, types and number of aircraft)	
NAME OF PILOT OR FLIGHT COMMANDER	PILOT'S OR FLIGHT COMMANDER'S ADDRESS		CERTIFICATE NO. OF PILOT OR FLIGHT COMMANDER
POINT OF DEPARTURE	CRUISING ALTITUDE(S) AND ROUTE TO BE FOLLOWED		
POINT OF FIRST INTENDED LANDING (IFR); OR INTERMEDIATE STOPS AND DESTINATION (VFR)	PROPOSED TRUE AIR SPEED AT CRUISING ALT.	PROPOSED TIME OF DEPARTURE P	ACTUAL TIME OF DEPARTURE D

ESTIMATED ELAPSED TIME UNTIL ARRIVAL OVER POINT OF FIRST INTENDED LANDING		ALTERNATE AIRPORT	FUEL ON BOARD		FREQUENCY OF RADIO EQUIPMENT	
HOURS	MINUTES		HOURS	MINUTES	RECEIVER	TRANSMITTER

ANY OTHER INFORMATION PERTINENT TO AIR TRAFFIC CONTROL, SEARCH AND RESCUE, OR SECURITY CONTROL (TIME OF ADIZ PENETRATION, ETC.)

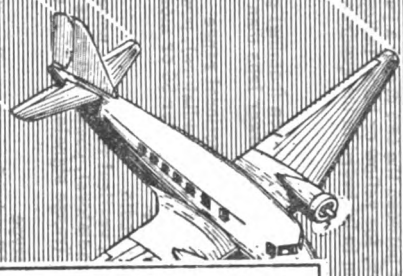
CLOSE FLIGHT PLAN UPON ARRIVAL

(10-9-51)

Form ACA-866 (1-51)

PLEASE POST!

AIRMAN'S GUIDE



SPECIAL NOTICE

Attention Private Pilots. INSACs where 122.2 mc not yet available will normally make VHF reply on VHF range. See details page 80

DIRECTORY OF AIRPORTS	Pages 21 through 76
RADIO FACILITY DATA	Pages 2 through 20
NOTICES TO AIRMEN	Pages 77 through 96

VOL. 6, NO. 16 ... OCTOBER 23, 1951

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION DEVELOPMENT

The printing of this publication has been approved by the Director of the Bureau of the Budget, March 28, 1950

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communications Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.
NOTE: See OMNIRANGES USE, page 80.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
✓ = New facilities or name changes, see page 20

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges. the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower. Air Force
CI. . . Control Tower (City, County. Private. etc.)
CN. . .Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS . . .Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. .Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . Range (loop radiators), power less than 50 watts
MM. .. VHF middle marker
MOR.. Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL .. Range (loop radiators), power 50 or more, but less than 150 watts
OM. . .VHF outer marker
P. . . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W . . Without voice facilities on range frequency
Z . . . .VHF station location marker at a range station.

RADIOTELEGRAPH CODE

A - ABLE •—	F - FOX ••—•	K - KING —•—	P - PETER •——•	U - UNCLE ••—	Z - ZEBRA ——••
B - BAKER —•••	G GEORGE ——•	L - LOVE •—••	Q - QUEEN ——•—	V - VICTOR •••—

FREQUENCY LEGEND

V = 135.9 and 135.0 mc transmitted.
# = Guards same VHF frequencies station transmits except 122.2 mc and 135.0 mc.
(1) = 3105,4495 kc guarded
(2) = 3105, 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7, 135.9 mc. This group of frequencies is group generally guarded by INSACS.,
e.g., (3) - 135.9, 122.1 = guards every frequency in group (3) except 135.9 and 122.1

NOTES

1. Range courses are magnetic in-bearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VOR or VAR is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

****
Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.
****

ALWAYS CHECK NOTICES TO AIRMEN SECTION

RADAR AVAILABLE : How and Where

PAR = PRECISION APPROACH RADAR. ASR = AIRPORT SURVEILLANCE RADAR.
GCA = GROUND CONTROLLED APPROACH - MILITARY EQUIVALENT OF COMBINED ASR AND PAR EQUIPMENT

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for this type of approach are at least as high as, and in some instances higher than, the regular circling minimums listed in the Flight Information Manual for the airport.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Flight Information Manual.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at the pilot's discretion.

After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible.

Civil minimums at military installations estabilshed by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.

Alt MSL=Min. alt. over airport.

(D) = Day. (N) = Night. ➤=New or revised data. ✓ = New facilities or name changes.

CAA RADAR UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL CAA UNITS GUARD THE VHF FREQUENCIES TRANSMITTED PLUS 3105, 4495 kc AND 122.5 mc. IN ADDITION TO THE FREQUENCIES LISTED, THEY TRANSMIT ON: 118.1, 121.5, 126.18 mc.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	C	-Commercial	MG	-Misc. Govt
A	-Army (May also be used by Army Nat'l Guard)	CG	-Coast Guard	N	-Navy
		I	-Intermediate	NG	-Air Nat'l Guard
		M	-Municipal	P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

DIRECTORY OF AIRPORTS
LEGEND

LONGEST RUNWAY
FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is either not available or not operating standard hours (sunset-sunrise).

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Portable lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway or Strip
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.
Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

FUEL OCTANE (cont)

Air Force and Navy Fuel

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: JP - 3
J4: JP - 4

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(k) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(l) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Usually unattended, offer no public service and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NAVY SPECIAL NOTICES
No. 12, 1951, Hydrographic Information with Hydrographic Office Monthly Notice for Aviators, such as Establishment or Discontinuance of Navy aids to navigation, Changes in Instrument approach procedures, Relocation of Target Areas, etc. can be published by the Hydrographic Office. The Chief of Naval Operations, Navy Department, Washington 25, D.C. is the official source for the Navy Special Notices.

AIR FORCE ARC-3...5 NAVY ARMY SERVICES
SCR-5247

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commanding Officer, USAF Aeronautical Chart & Information Service, Washington 25, D. C.; Attn: Aeronautical Information Division.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters USAF ACIS.

In connection with the above, the attention of all base operations officers is invited to A. F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A. F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields"

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, COAST GUARD AND ARMY:
Listed below are Standard VHF Channels for the Air Force, Navy, Coast Guard and Army.

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion; Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**In 4 channel equipment (ARC-5 and SCR-522) 132.3 mc or 142.02 mc may be substituted on Channel C and D in accordance with operational requirements.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A. N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

(10-23-51)

✓ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, Calif.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; Westover AFB, Mass.; or Mitchel AFB, N. Y.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C. March AFB, Calif.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by Aeronautical Chart and Information Service and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing station, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listing given in paragraph 5 of this regulation. Base operations officers, weather and communication units should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11); M-59, November 5, 1949 (Service "B").

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fifth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of Dec. 27, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, January 9, 1951; **Teletype Maps: M-11 December 1, 1949, and M-14,** April 15, 1950 (Service "A"); M-10, **October 1, 1949, and M-13, November 1, 1950 (Service** "C"); M-58, August 15, 1950 (Service "A", "C", and "O").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with Revision 6. (Revisions 1-5 obsolete). **Teletype Maps M-89, February 1, 1950 (Service "O") and M-58** (Service "A", "C" and "O").

Requests for distribution should be directed to Commanding Officer, Aeronautical Chart and Information Service, Washington 25, D. C. Attn: Aeronautical Information Division.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

COMPULSORY REPORTING POINTS- VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UHF CHANNELIZATION: An initial UHF channelization plan has been approved for USAF and USN UHF-equipped aircraft in the U. S. and will be published in subsequent issues of the Radio Facility Charts. UHF frequencies which are being first implemented at USAF stations on a continuing program beginning 1 July 1951 are:

Channel 1	**Control tower (military primary)**	**236.6 mc**
" 15	**Military Airways**	**258.20 mc**
" 17	**GCA**	**335.80 mc**
" 18	**GCA**	**289.40 mc**
Guard	**Military emergency**	**243.00 mc**

It is contemplated that CAA stations, towers and centers will provide service on UHF. The channels to be used and the date that the services are to be available will be published later.

√CHANGES FOR PILOT'S HANDBOOK (EAST) U. S.: (1) Stewart AFB, Newburgh, N.Y. LF Rdo Rng procedure is authorized for USAF use. Elev: 471', freq. 335 kc, ident: SWF. Weather minimums: 600-1 day, 600-2 night. Initial apch NE crs 3000' from int N crs POU rng SE crs 3000' from Int. S crs POU rng. SW crs 3000' from Int NW crs LGA rng. NW crs min enroute alt. Final apch NW crs. Procedure turn W side of NW crs, 2500' within 15 mi; 3300' within 25 mi. Alt over SWF rng on final apch 1300'. Mag. bear. and dist from SWF rng to arpt: 124°, 2.5 mi. If ctc not established within 2.5 mi after passing SWF rng, make immediate 180° left turn and climb to 3000' on NW crs.

(2) Godman AFB, Ft. Knox, Ky. The following ADF Procedure is authorized for USAF use: This supersedes all previous data furnished. Elev. 753', ADF procedure utilizing Godman Homing Bcn, freq. 323 kc, ident: FTK. Wea. minimums: 500-1 day, 500-2 ngt. Initial apch: 2500' from LOU rng. 26.5 mi, 224°. 2500' from LEX Homer, 73 mi, 264°. 2500' from BWG rng, 74 mi, 15°, 2500' from EVV Rng, 85 mi, 96°. 2500' from IND Rng, 123 mi, 169°. Final apch track: 352° mag. outbound. 172° mag inbound. Procedure turn: W side of 352° track, 2500' within 25 mi. Alt over FTK bcn on final apch: 1500'. Mag. bear. and dist from FTK bcn to arpt: 172°, 3.1 mi. If visual ctc not established at authorized lndg minimums within 3.1 mi after passing FTK bcn, or if lndg not accomplished, climb to 2500' on 172° track.

(3) AL-76, dtd June 7, 51. Charleston, S. C. Change NW crs of LF rng from 110° to 120°.

(4) AL-381, dtd Feb. 27, 1951. Hunter AFB, Savannah, Ga. Change NW and SE courses of LF rng from 153° to 333° to 141° and 321° respectively.

(5) AL-380, dtd Apr. 16, 1951. Travis (Chatham) Field, Savannah, Ga. Change NW and SE courses of LF rng from 153° to 333° to 141° and 321°, respectively.

(6) AL-196, dtd July 27, 1949. Houlton, Maine. Change elev of arpt to 498'. Change min alt over aerodrome to 1298'. Change initial apch to: E crs 2000' from int W crs FC Rng. S crs 2500' from int E crs MLT Rng. Change Missed Apch Procedure to: If visual ctc not established at authorized lndg minimums within 3.1 mi after passing HUL Rng or if lndg not accomplished, climb to 2500' on S crs.

(7) AL-268, dtd Sept. 1, 1950. Brookley AFB, Mobile, Ala. Change SW crs of MOB Rng to 217° outbound, 38° inbound. Change initial apch to: SE crs 1300' from int W crs PNS Rng. W to SW crs 1500' from int SE crs BIX Rng.

√CHANGES FOR PILOT'S HANDBOOK (WEST) U. S.: (1) AL-588, dtd Mar. 29, 1951. Butte, Mont. Proc. No. I. Change Initial Apch to: N crs not authorized.

(2) AL-98, dtd May 3, 1951. Corpus Christi NAS, Texas. Change missed apch to: If visual ctc not established at authorized lndg minimums within 2.9 mi after passing Navy

Corpus Christi rng, or if hdg not accomplished, turn rgt to crs of 95°, maintain 500' until 4 mi E of N crs Corpus Christi NAS rng then climb to 1500' on 95° crs and ctc Corpus Christi NAS Twr for futher instructions.

(3) AL-87, dtd May 28, 1951. ADF Peterson Field, Colorado Springs, Colo. Change Initial Apch to: 7200' from Fountain FM to LOM (Final) 3.3 mi, 345°. Change Procedure Turn to: E side of 166° track 7200' within 25 mi. Change alt over LOM on final apch to 7200'.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised on hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, Washington 25, D.C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Airman's Guide.

CIVIL USAGE OF MILITARY FIELDS: U.S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data or data impossible to incorporate in the two above tabulations.

DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The locations at which this direct communications procedure is available are listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing.

VERY HIGH FREQUENCIES FOR PRIVATE PILOTS: Use of very high frequency channels by the majority of private pilots has heretofore been limited to the channels 121.5, 122.1, 122.5 and 122.8 mc. Now, however, any private pilot having need for additional channels may apply to the FCC for use of any of the 40 channels in the 118.1 to 126.7 mc band. To determine their additional requirements, pilots should consult the Airman's Guide (Radio Facilities Section) or contact the nearest CAA regional office for information concerning the channels which have been implemented at the various locations. Of particular interest may be the channel 126.7 mc which was previously limited to use by air carriers for communication with CAA stations (INSACS) but now may be used by any private pilot if required for that purpose.

DVFR FLIGHT PLANS: When an IFR flight plan is canceled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

√AERONAUTICAL ADVISORY STATIONS (FREQUENCY 122.8 mc): This requency is known in some areas as the "private flyers frequency" and also as "UNICOM". Licenses for ground stations and aircraft are now being issued by the FCC subsequent to receipt of application for license from private pilots and airport operators eligible to use the frequency. Under the FCC rules, private aircraft may use 122.8 mc for communication with aeronautical advisory stations and between private aircraft themselves while in flight. Particular attention is invited to Section 9.1001 which follows:

"9.1001 Eligibility for station license. Authorizations for aeronatuical advisory stations will be issued only to the owner or operator of a landing area, not served by an airdrome control station. Only one Aeronautical Advisory station will be authorized at a landing area"

The scope of service to be rendered under FCC rules for the ground station is:
"9.1004 Scope of service. (a) Communications shall be limited to the necessities of safe and expeditious operation of aircraft. The service shall be advisory in nature, pertaining to the condition of runways, types of fuel available, wind conditions, available weather information or other information necessary for aircraft operations. (b) Aeronautical Advisory stations shall not be used for the control of aircraft."

The following locations have been reported as having Aeronautical Advisory Service available:

Bloomsburg Arpt, Pa. (0800-2300)
Claremont Arpt, N. H. (daylight hours)
Concord Arpt, N. H. (daylight hours)
Davenport Arpt, Iowa (0730-2000)
Englewood Arpt, Colo. (0800-dark)
Flat Rock-Nan Bar Arpt, Mich. (0800-sunset and hrs prior req.)
Keene-Dillant-Hopkins Arpt, N. H. (daylight hours)
Laconia Arpt, N. H. (daylight hours)
Lebanon Arpt, N. H. (daylight hours)
Lima Arpt, Ohio (0800-sunset)
Marietta, Ga., Parkaire Field
McAllen Arpt, Texas (0800-1900)
Muncie Arpt, Ind. (daylight hours)
Nashua Arpt, N. H. (Borie Field) (daylight hours)
Odessa, Texas, Ector Arpt, (0800-dark)
Racine, Wisc., Horlic-Racine Arpt.
Revere Arpt, Mass. (0900-sunset)
Sunny South Arpt, Fla. (0800-sunset)

Airport operators interested in providing this service may obtain further details from the nearest FCC or CAA field office.

AIR TRAFFIC CLEARANCES: The initial traffic clearance issued to an aircraft prior to departure will normally authorize flight to the point of first intended landing, with instructions to maintain the altitude at which the aircraft enters the next control area. The pilot should request any desired altitude changes en route. Better service can be given the

pilot if any altitude change is requested at the time the change is desired. An amendment to the initial clearance may be issued to a flight at any time the air traffic controller deems such action necessary to avoid possible confliction between en route, landing, or departing aircraft. A flight is always cleared to a specific point or location (radio or visual reporting point), defined as a clearance limit. If the assigned altitude is below the minimum for a subsequent portion of the flight and radio failure is experienced, the procedures outlined under TWO-WAY RADIO FAILURE must be followed to insure proper terrain clearance.

Whenever an aircraft has been cleared to a point other than the destination airport it is the responsibility of Air Traffic Control to issue whatever further clearance is appropriate at least five minutes before the aircraft arrives at the clearance limit, unless holding instructions and a time at which the pilot may expect further clearance have been received and acknowledged by the pilot. In the event a pilot arrives at a clearance limit without having received either a clearance beyond or holding instructions at such fix, he should immediately request further clearance and hold at the clearance limit, maintaining the last assigned altitude, until further clearance is received. When a clearance limit is a point other than the destination airport, the altitude of the aircraft at this clearance limit will be protected so that separation will exist in the event the aircraft must hold awaiting further clearance. NOTE: The foregoing should not be construed as being related in any way to the procedures which apply when a two-way radio failure occurs.

INSAC VHF REPLY TO PRIVATE AIRCRAFT: The new national ground-to-air call-up and reply channel for communication with private aircraft, 122.2 mc was implemented at certain INSACs on August 1, 1951. Eventually, all INSACs will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACs which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current NOTAMS for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call. When an INSAC is unable to reply on the VHF range voice channel because of equipment failure or maintenance shutdown, reply will be made on 121.5 mc. A small number of INSACs have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

√OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

√ON-REQUEST REPORTING POINT: Effective immediately the following on-request reporting point is established: BAYSHORE INTERSECTION - The intsxn of the S crs of West Palm Beach, Fla. (LF) rng, and the E crs of the Miami, Fla. (LF) rng.

√INSTRUMENT APPROACH PROCEDURES: The standard instrument approach procedure for the Low Frequency Range at Effingham, Ill., CAA Int. Field, has been CANCELLED.

√DANGER AREAS: The following Danger Area amendment shall be effective on October 30, 1951, unless otherwise advised:

AMENDMENT NO. 1

(1) The Ajo, Arizona area, published on May 17, 1951, in 16 F. R. 4607, and amended on August 23, 1951 in 16 F. R. 8448, is further amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat. 32-50-30, long. 112-48-00; due S to lat. 32-48-30; southerly along Arizona Highway No. 85 to lat. 32-31-00, long. 112-53-00; due W to long. 112-57-00; due S to lat. 32-20-00; due W to long. 113-00-00; due S to the Mexican border at lat. 31-56-00; WNW along the Mexican border to lat. 32-23-45, long. 114-28-30; due N to lat. 32-30-00; due W to long. 114-31-00; due N to lat. 32-35-00; due E to long. 114-28-30; due N to lat. 32-39-40; easterly to lat. 32-40-45, long. 114-18-20; easterly along the Southern Pacific Railroad and U. S. Highway No. 80 to lat. 32-45-30, long. 113-37-30; easterly to lat. 32-50-30, long. 112-48-00, point of beginning.

(2) The Camp Gordon, Georgia area, published on January 3, 1951 in 16 F. R. 4, and amended on July 27, 1951 in 16 F. R. 7351, is revised to read: Location: CAMP GORDON (Savannah Chart); Description: Area I - Beginning at lat. 33-23-35, long. 82-08-30; S to lat. 33-22-15, long. 82-08-18; SW to lat. 33-21-35, long. 82-09-10; W to lat. 33-22-15, long. 82-17-00; NE to lat. 33-25-00, long. 82-12-00; ESE to lat. 33-23-35, long. 82-08-30, point of beginning; Altitudes: Surface to 5000'; Time: 0700 to 1900, Monday through Saturday; Using Agency: Commanding General, Camp Gordon, Ga.

Area II. Description: Beginning at lat. 33-21-35, long. 82-09-10; SW to lat. 33-16-20, long. 82-18-00; WNW to lat. 33-17-29, long. 82-23-00; NE to lat. 33-21-15, long. 82-18-47; NE to lat. 33-22-15, long. 82-17-00; E to lat. 33-21-35, long. 82-09-10, point of beginning; Altitudes: Surface to unlimited; Time: Continuous; Using Agency: Commanding General, Camp Gordon, Ga.

(3) The Presque Isle, Maine area, published on September 7, 1951, in 16 F. R. 9070, is amended by changing the "Description by Geographical Coordinates" to read: "Beginning at lat. 47-00-00, long. 68-25-00; SSW to lat. 46-30-00, long. 68-35-00; WNW to lat. 46-45-00, long. 69-45-00; NNE to lat. 47-20-00, long. 69-15-00; SE to lat. 47-00-00, long. 68-25-00, point of beginning, excluding that portion which lies outside of the boundary of the United States.

(4) The Grand Marais, Minnesota area, published on July 16, 1949, in 14 F. R. 4292, is amended by changing the "Using Agency" column to read: "Organized Naval Air Reserve Squadrons, NAS (Minneapolis - St. Paul International Airport), Minneapolis, Minn."

(5) The Upper Red Lake, Minnesota area, published on July 16, 1949 in 14 F. R. 4292 is amended by changing the "Using Agency" column to read: "Naval Air Station (Minneapolis - St. Paul International Airport), Minneapolis, Minn.

(6) The Las Vegas, Nevada area, published on November 30, 1949 in 14 F. R. 7198, is amended by changing the "Using Agency" column to read: "Nellis Air Force Base, Las Vegas, Nevada".

(7) The Tonopah, Nevada area, published on July 16, 1949, in 14 F. R. 4293, and amended on March 29, 1951 in 16 F. R. 2720, is further amended by changing the "Using Agency" column to read: "Nellis Air Force Base, Las Vegas, Nevada".

(8) The Brant Island, North Carolina, area, published on September 22, 1951, in 16 F. R. 9680, is amended by changing the "Time of Designation" column to read: "0600 to 0030 daily".

(9) The Point of Marsh, North Carolina, area, published on September 22, 1951 in 16 F. R. 9680, is amended by changing the "Time of Designation" column to read: "0600 to 0030 daily".

(10) The Midland, Texas area, published on July 16, 1949 in 14 F. R. 4296, is amended by changing the "Using Agency" column to read: "Walker Air Force Base, Roswell, New Mexico".

(11) A Great Salt Lake, Utah temporary area is added to read: Location: GREAT SALT LAKE (Salt Lake City Chart); Description: Beginning at lat. 41-10-00, long. 112-35-00; SE to lat. 41-06-30, long. 112-32-00; southerly to lat. 40-57-00, long. 112-30-45; due W to long. 112-50-00; due N to lat. 41-10-00; due E to lat. 41-10-00, long. 112-35-00, point of beginning; Altitudes: Surface to unlimited; Time: Continuous, October 30, 1951 through November 23, 1951; Using Agency: Hdqs., 15th Air Force.

(12) A Chesapeake Bay, Virginia area, is added to read: Location: CHESAPEAKE BAY (Norfolk Chart); Description: Beginning at lat. 37-43-35, long. 76-00-40; SSW to lat. 37-27-00, long. 76-05-55; due W to long. 76-08-00; northerly to lat. 37-45-00, long. 76-09-35; due E to long. 76-08-55; counterclockwise along the arc of a circle with a radius of 5 nautical miles centered at lat. 37-47-54, long. 76-03-48; to lat. 37-43-35, long. 76-00-40, point of beginning; Altitudes: Surface to 30,000'; Time: Daylight and darkness, 7 day a week, during VFR or better weather conditions; Using Agency: Service Force, U. S. Atlantic Fleet, U. S. Naval Base, Norfolk, Va.

(13) The Ship Shoal Island, Virginia area, published on July 16, 1949, in 14 F. R. 4297, and amended on December 6, 1950, in 15 F. R. 8627, is revised to read: Location: SHIP SHOAL ISLAND (Norfolk Chart); Description: Beginning at lat. 37-08-00, long. 75-57-30; due N to lat. 37-11-00; NE to lat. 37-21-00, long. 75-46-30; due E to long. 75-39-00; southwesterly paralleling the shoreline at a distance of 3 nautical miles to lat. 37-08-00, long. 75-47-00; due W to lat. 37-08-00, long. 75-57-30, point of beginning; Altitudes: Surface to unlimited; Time: Continuous; Using Agency: Hdqrs., 47th Bombardment Wing, Light, Langley

(10-23-51)

Langley AFB, Va.

(14) The Coulee Dam, Washington area, published on September 1, 1949 in 14 F. R. 5426 and amended on November 3, 1949 in 14 F. R. 6676, is further amended by changing the "Using Agency" column to read: "325th Fighter Wing, Larson Air Force Base, Moses Lake, Washington".

(15) A Culebra Island, Puerto Rico, area is added to read: Location: CULEBRA ISLAND (WAC 649); Description: Airspace over Culebra Island and the surrounding waters extending to the 3 nautical mile limit from the shoreline; Altitudes: Surface to 50,000'; Time: Continuous; Using Agency: Dept. of the Navy.

(16) A Desechoe Island, Puerto Rico, area is added to read: Location: DESECHOE ISLAND (WAC 648); Description: A circular area having a radius of 5 miles centered at lat. 18-23-00, long. 67-29-00; Altitudes: Unlimited; Time: Continuous; Using Agency: Strategic Air Command.

(17) A Monita Island, Puerto Rico, area is added to read: Location: MONITA ISLAND (WAC 648); Description: A circular area having a radius of 4 miles centered at lat. 18-09-30, long. 67-57-15; Altitudes: Unlimited; Using Agency: Strategic Air Command.

(18) A Vieques Island, Puerto Rico, area is added to read: Location: VIEQUES ISLAND (WAC 649); Description: Airspace over Vieques Island and the surrounding water extending to the 3 nautical mile limit from the shoreline; Altitudes: Surface to 50,000'; Time: Continuous; Using Agency: Dept. of the Navy.

✓FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Vol. 5, No. 2 dated June 15, 1951 as follows:

(1) Page 73. Delete Laredo Broadcast Station KPAB.

(2) Page 10. Thermal, Calif. INSAC telephone number changed to: 95186.

(3) Page 15. Cheyenne, Wyo. INSAC telephone number changed to: 8-8211; WB number changed to: 5-5261. Aviation Safety District Office number for Cheyenne, Wyo. changed to 6-6307.

✓USE OF "V" TO DISTINGUISH VAR TYPE RANGE: Effective on or about Nov. 15, 1951, the letter "V" will be transmitted by all VAR ranges. It will precede the usual location identifier and be separated from it by a short space.

The "V" will be transmitted at an appreciably higher rate of speed than the location identifier.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

NOTE: Because of space limitation such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (7-25)
ANNISTON ARPT: Strips being extended. Avoid new extensions. (7-16)
BIRMINGHAM-RADIO: June 25, omnirng shut down - relctn.
BIRMINGHAM ARPT-TOWER: Oct. 1, CAA ILS shut down until approx Nov. 1 - modernization. Mrkrs and compass lctrs will cont to oper during this period. (10-15) FLD: 2-way rdo rqrd ngts, rcvr days. (9-7) No Navy acft svcg avail from lcl sunset to 0800 CST. NAS clsd 2400-0700 (inadequate crash/fire equip.) (10-2)
BROOKLEY AFB (MOBILE): Acft making VFR descent to Brookley under low visibility conditions will let down S of Mobile to avoid Bates Fld and G-6 Arwy tfc. (1-29)
ALABAMA: DOTHAN-NAPIER FLD: Ctn - vehicles on rnwys. (8-20)
EVERGREEN-RADIO: Omnirng flgt-checked, radials 240° clockwise thru 280° displaced counter-clockwise 1°. Crs displacement in cone area slightly greater than normal. (10-18)
MAXWELL AFB (MONTGOMERY)-RADIO: USAF rng crs have multiples 20 mi from stn. (5-10) En route acft ctc Montgomery Rdo on VHF. (9-6)
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (9-20)
MONTGOMERY-RADIO: A maximum of one half degree in excess of allowable error will be found in E sector omnirng between radials 90° and 118°. (6-14)
MONTGOMERY-DANNELLY FLD: Rnwy 3-21 clsd days. First 200' clsd ngts. Equip. on rnwy, NE taxi strip clsd (const), mrkd. (9-10)
ARIZONA: DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. (8-27) W fld; Rnwy 17-35 temp clsd. Equip. adj to Rnwy 12-30. (9-21)
LUKE AFB (PHOENIX): Ctn - extensive const all rnwys. (9-10)
PHOENIX-SKY HARBOR ARPT: Rnwy 8L-26R clsd xcpt for taxying. Const on ramp area in front of terminal bldg (mrkd). Taxi strip N of Rnwy 8L-26R avail. (10-2) Rnwy 8R-26L clsd (const). (10-13)
PRESCOTT ARPT: Strip at end Rnwy 3-21 clsd (const). Use rnwys only. (8-17)
WINSLOW-RADIO: Oct. 25, visual-aural rng will be shut down until approx Dec. 25 - conversion to VOR fac. (9-27)
YUMA CO. ARPT: Maximum alt within 3 mi radius 500' above arpt. Rgt tfc Rnwys 17 and 26. Diagonal Rnwy 3-21 not to be used by civil acft. Watch for AF acft. Tow-target planes will enter tfc area flying parallel to Rnwy 26, then will turn and fly parallel to Rnwy 21 and take-off Rnwy 26. Civil acft use Rnwy 17 wind permitting. (9-11) Const intsxn Rnwy 3-21 and 17-35 ngts. (9-17)
ARKANSAS: BRINKLEY-FEDERER MEMORIAL ARPT, SITE 37, DAL-LOU: Clsd ngts. Rows of dirt on SW end NE/SW Strip, use emerg only. (9-13)
FT. SMITH ARPT: Equip. on W end E/W Rnwy. (7-24)
LITTLE ROCK-ADAMS FLD: Rnwys 14-32 and 4-22 clsd (repairs). Lmtd NG svcg. (10-1)
ROGERS ARPT: Rnwy lgts inop. (8-28)
TEXARKANA-RADIO: Sept. 5, omnirng shut down until approx Nov. 5 - modernization. (9-5)
WALNUT RIDGE-RADIO: Omnirng radials 290-320° and 120-150° have severe bends and crs roughness. (3-2)
CALIFORNIA: BAKERSFIELD-RADIO: Omnirng has slight to moderate scalloping in SE quad 80° to 123°. (9-18)
BROWN ALF (SAN DIEGO): Clsd - const. (9-20)
BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans jet acft. (8-27)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat. 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft will oper below 300' during VFR wea. conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.
CAMARILLO-RADIO: Oct. 4, LF rng shut down for relctn to lat 34-11-24, long. 119-05-15. Concurrently fac operg at new lctn as an H fac, freq: 359kc, ident: CAV, until approx Nov. 4, when it will be converted to SRAWZ rng. Corner twrs new lctn mrkd day, ngt. Usable dist W is 40 mi; E is 25 mi. (10-4)
CAMP COOKE (LOMPOC): Authorized visiting acft enter on heading of 290° at 2,000' from town of Lompoc, to avoid active firing rngs. (6-25)
CHINO-PACIFIC AIRMOTIVE ARPT: Ctn - F-51 and C-54 acft operg in vcnty. Acft parked on mat area; taxying on rnwys. (3-13)
CRESCENT CITY-RADIO: Omnirng radials 90° thru 180° to 270° usable dist 25 mi. (9-27)
CRESCENT CITY-DEL NORTE CO. ARPT: Drifting sand across W end taxi strip leading to Rnwy 11. Use rnwy for taxying only. (9-5)
DAGGETT-RADIO: Oct. 18, omnirng shut down until approx Nov. 3 - modernization. Upon completion, freq. will be changed to: 113.2 mc. (9-28)
★EDWARDS AFB (MUROC)-RADIO: Effect. Oct. 15, USAF LF rng ident changed to EDW. (10-25)
EDWARDS AFB (MUROC): Lctd within a danger area. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont to fld. (4-23)
EL TORO MCAS (SANTA ANA)-TOWER: GCA minimums temp raised to 500' ceiling and 1 mi visibility day and ngt, during const on fld. (9-21) FLD: Ctn exten const. (9-21)
FT. ORD (MONTEREY): P-lines and rising elev 1/4 mi E. Lnd only in area mrkd in white.
FRESNO AIR TERMINAL: S half taxiway connecting apch ends Rnwys 7 and 11 clsd. (10-15)
GEORGE AFB (VICTORVILLE): Ctn - rnwys under const. (8-3)
HAYWARD ARPT: Rnwy 10R-28L reserved for acft with cruising speed greater than 130 mph. Rnwy 10L-28R reserved for acft with cruising speed less than 130 mph. (4-5)

CALIFORNIA: ★INYOKERN NAF-RADIO: Navy elliptical-shape FMs on N crs: Armitage FM lctd lat 35-39-15, long. 117-49-45, ident changed from three dashes to one dash. Inyokern FM lctd lat 35-44-00, long. 117-39-45, ident two dots one dash. (10-15)

LOS ANGELES-RADIO: Visual-aural rng has moderate scalloping in N sector. (9-28)

LOS ANGELES INTERNATIONAL ARPT-TOWER: CAA ILS LMM and OMM cont to be aligned to rnwy 25L while the lclzr and glidepath are temp aligned on rnwy 25R. (9-28) FLD: Rnwy 7R-25L usable portion reduced to 4500' from apch end 25L, const across W end. Rnwy 25L clsd for take-offs and Rnwy 7R clsd lndgs 0700-1700 daily xcpt Sat and Sun. Rnwy 4-22 clsd (const). Equip. on and adj const area. Use paved areas only. Two green transverse bar lgts mrk threshold Rnwy 25L. New rnwy extensions and W portion of fld clsd-const.(mrkd). (9-28)

MARCH AFB(RIVERSIDE)-RADIO: USAF VHF/DF inop.

MARCH AFB(RIVERSIDE): Formations more than 15 acft expect delay more than 1 hr. Ext const all rnwys. (8-28)

MOFFETT NAS (MTN VIEW): Max. wheel load: Rnwy 14L-32R, 40,000 lbs; Rnwy 14R-32L, 30,000 lbs. (2-21) Rnwy 14R-32L clsd (const). Equip. on fld. (10-12)

★MONTEREY NAAS-RADIO: Navy H fac oper cont during IFR, "on req" during VFR. (10-5)

NEEDLES ARPT, SITE 25A, LAX-AMA: 80 octane gas not avail. (9-24)

NORTON AFB (SAN BERNARDINO): Ctn-equip. on fld days. (3-29)

OAKLAND-RADIO: Omnirng maximum usable dist, 40 mi N thru E at minimum inst alt. (6-18)

OAKLAND ARPT: Channel clsd to seaplanes, LST craft moored in channel. Lgt acft use gravel area. Large acft use concrete taxiways. Const vcnty hangar 5 and lndg area from hangar 3 to W bndry. (8-16)

OCEANSIDE ARPT: Lgts inop. (10-21)

PASO ROBLES ARPT: About Nov 1, fld will be clsd. (10-10)

PESCADERO-RADIO: Oct 8, HHW placed in cont oper for 30 days. Freq: 190 kc. Ident: PES. (10-10)

SAN DIEGO-RADIO: Omnirng has lgt to moderate scalloping in all quads. (6-12) Lemon Grove FM on E crs LF rng reduced in pwr to 80 watts. (7-24)

SAN DIEGO-LINDBERGH FLD: Const on ramp adj to terminal bldg. (8-14)

SAN DIEGO NAS: Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft lnd on hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious Base, tfc lanes at North Island. (2-21)

SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6) Civil pilots use extreme ctn when flying near Hamilton AFB due to extreme rate of closure between jet acft and small civil acft. (1-17)

SAN FRANCISCO-RADIO: Omnirng-spurious signals between hrs 1200 and 1900 causes lgt flag alarm and crs roughness on 117.6 mc at 1500' within 1/2 mi radius of Mackay transmitter stn lat 37-26-44, long. 122-06-40. (10-12)

SAN FRANCISCO ARPT: Apch lgts inop. Rnwys clsd days intermittently. Taxi with ctn. Equip. on fld days. (6-27) New terminal bldg const and 130' mrkd equip. lctd SW quadrant rnwy intsxns 1250' from Rnwys 10R-1L. (10-4)

DIST. OF COLUMBIA: DISTRICT OF COLUMBIA-SPECIAL NOTICE: Attention must again be brought to pilots operating in the Washington National Airport Area regarding close adherence to the established traffic patterns. The CAA is receiving an alarming increased number of complaints regarding "Noise Nuisance" from communities in the vicinity, especially from Alexandria. It is felt that some of these complaints are justified in view of the many reports of low flying from communities some distance from the airport. The Administrator of Civil Aeronautics is desirous of having all pilots use the maximum permissable altitudes rather than the 1200' minimum in the proper pattern procedures on approaching Washington National Airport.

ANACOSTIA NAS-RADIO: Navy VHF/DF inop-repairs. (4-30)

ANACOSTIA NAS: Ctn-const on N side of fld near apch end Rnwy 21. Equip. on fld. (10-8)
